Skills

React, React-Native, Redux, Javascript, HTML, CSS, Python, UI/UX design, UI prototyping.

Experience

August 2020 - present
Portee, Botswana – *React Developer*

- Used React native to build the new version of the orange botswana mobile network mobile application.
- Using React native to build a new mobile application that plays and shares music amongst its users.

February 2019 - March 2020
ExxonMobil, Lagos – *Planning Engineer*

- Designed the Women's Interest Network website and collaborated with the tech team.
- Coordinated project teams to ensure reports were submitted on time and project deadlines were met.
- Collected data, analyzed and created reports for the stakeholders on the ongoing projects.

January 2018 - November 2018
Doctoora, Lagos – *Frontend Engineer*

- Developed the second version of the web application using react with collaboration with a back end engineers and a product designer.
- Maintained the old web app until it was time to migrate to the new one.

Education

May 2020 - June 2020
Udacity – *React Developer Nanodegree*

As a requirement for graduation from the Nanodegree, students had to work on 3 projects, one of which was React native. I learned how to program and test the application on a simulator and an

actual device by building a game application that helped users memorize any topic they wanted. I also worked on a library web app that saved different books into different categories(shelves) and a voting project that let users pick between 2 options.

September 2012 - November 2017

Bells University of Technology, Ota – *B.Eng*

I spent five (5) years in the bells university of technology studying mechanical engineering. I graduated with a second class upper degree in 2017
